Corporate Fashion. Our Passion.

Corporate fashion that fits – you, your team, your success.

“

We design clothing concepts that seamlessly unite design, functionality, and brand identity.

Every detail is crafted with the highest standards of quality, fit, and style – for garments that not only fit perfectly but inspire confidence.

As a family-run company with more than 35 years of experience, we combine passion with precision.

From the first idea to the final realization, we accompany you as a trusted partner – with a team that brings your vision to life through creativity and dedication.

Flexible and premium – designed in Germany, worn around the world.

hw

Tailored Clothing Concepts.

Individual. Stylish. Functional.

By combining bespoke CI productions with carefully selected stock items, we create efficient, high-quality clothing solutions that express a strong brand identity and deliver a distinctive, recognizable look.

Brainstorming & design consultation.

From inspiration to style.

We take the time to understand you and your brand – with sensitivity, experience, and an eye for what makes you unique. True corporate fashion emerges where identity meets design. That's how we create clothing that conveys attitude – individual, refined, and full of personality.

Project planning & strategy.

We structure ideas and define goals.

We establish reliability by providing a clear, well-organised project process. A defined timeline, transparent services and clear cost structures form the basis of efficient collaboration. With our modular service packages, we tailor each project to your specific needs – from design and production to webshop and logistics solutions – ensuring you always have full control over progress and budget.

Design sketch development.

Your brand takes shape.

Ideas become form, visions turn into identity. Our designers translate your brand values onto paper – with a keen sense of style, emotion, and authenticity. Each sketch tells your story: of unity, professionalism, and pride – the pride of belonging to a brand. This is how we create corporate fashion that connects and inspires.

3D modeling.

Reality in motion – we let fabrics speak.

Using state-of-the-art 3D technology, we visualize your corporate fashion before production begins. Digital models reveal fit, movement, and design in lifelike detail – enabling fast alignment and confident decisions. The result: an efficient development process, reduced sample costs, and maximum planning reliability with consistently high design quality.

”

Our clothing concepts combine bespoke CI productions with carefully selected stock items, creating flexible and cost-efficient solutions precisely tailored to your needs – functional, premium, and true to your brand.

Whether corporate fashion, team apparel, technical workwear, or custom accessories – we design garments that reflect your brand in every detail.

One concept. Endless possibilities.

Diversity that Unites.

*Corporate fashion perfected down to the last detail
– for every team, every role, every industry.*
